25X1

STRATEGIC SERVICES UNIT-WAR DEPARTMENT

15 October 1946

Country: Germany/Russian Zone

Subject: Research on and Production of War Materials

25X1

1. The Osan plant in Berlin-Köpenick, now officially known as the "Ingenieur Institute", is under the direction of a Russian colonel and included the following research and production in its program of 15 September 1946:

   a. Radar equipment of the "Berlin" model including testing and tuning equipment.

   b. Acoustic torpedoes and testing equipment.

   c. Identification signal equipment of the "Quiting" model, including testing equipment "Gamma".

   d. Ultra high frequency sound equipment based on "Asdic" (echo sounding) principles with testing apparatus.

   e. Electric and mechanical units for V-weapon steering devices.

25X1 2. [redacted] V-2 and V-1 missiles are assembled at the Osan plant and stored in the yard as well as in a repaired assembly hall.

25X1

25X1 3. Soviet naval research is handled by a separate section known as KMP (Ministry for the Shipbuilding Industry) which deals with submarine turbines and equipment for remote control of vessels. [redacted] Comment: For further details on these research groups see [redacted] There may be a connection between this section and the firm Wilhelm in Charlottenburg (adv. probably Otto Wilhelm listed as producer of radio equipment) and the Bayken shipyard in Hamburg. Both are producing submarine air ducts which are tested at Buddem (northeast of
